

CELDT Student Test Results
November 20, 2009

The CELDT Test Results report will print the results from the CELDT test for the Test Year and Testing Administration selected. This report will include the Test description, test grade, test date, raw scores and scale scores. The Average Raw Score is calculated using all students in the same grade at the time of testing and will be printed on the report under the Grade Average.

The Scale Score Level will also be calculated and on the far right hand side of the report a graph will print indicating where the student falls according to the Scale Score Level. The bottom of the page will print the descriptions for the columns above the graph.

Table containing student information for Tanya A. Abejon, including test results for CA ENG LANG DEV TEST, LISTENING, SPEAKING, READING, WRITING, and COMPREHENSION. Includes a scale score level graph for each test part.

BEG = Beginning EINT = Early Intermediate INT = Intermediate EADV = Early Advanced ADV = Advanced N/A = Not Available

NOTE: Please note at the current time this report is only generating results for the test scores from the 2008 and 2009 test scores.

The **Scale Score Level** and graph printed on the report is calculated from the Performance Level Scale Score Ranges located in the CELDT Instruction Manual.

The Performance Level Scale Score Ranges from this report have been imported into the **TNP** table in Aeries as Scale Score Levels which will contain the High Score for each level. It is crucial that this table is accurate in order to print out accurate **Scale Score Levels** on the **CELDT Student Test Result** report.

The only scores available to generate this report are for the 2008 and 2009 Test Year. The **Test Year MUST** be selected to generate this report. After the **Test Year** has been selected this report can be generated for ALL test records for the Test Year selected. For example, if the 2009 Test Year is selected, the CELDT testing date range is 07/01/2009 – 06/30/2010. So any student with a Test Date within this date range will be printed.

After the test year has been selected, the option is now available to print scores for a particular **Test Admin** within the CELDT testing date range. For example, the 2008 Test Year is selected below and the CELDT testing date range is 07/01/2008 – 06/30/2009. So ALL Test Admins within that date range will display in the drop down list.

This report can be generated by student name, a particular counselor or specific grades. The grade range will only display for the grades currently in the Student (**STU**) table. For example, this is a high school that has pre-enrolled 8<sup>th</sup> graders. So this report can be generated for 8<sup>th</sup> grade students.

This report can be generated for all students or select students and can also **Include Inactive Students**. An individual page can be generated for each student or a continuous report can be generated. After making the selections click the mouse on the **OK** button.

The following example was generated to include **Inactive Students** sorted by **Counselor**. An **asterisk** prints to the left of the **Stu#** indicating the student is inactive. The counselor name prints on the report since it was sorted by counselor name.
