

Import Fixed Length Files – Procedures November 17, 2009

The **Import Fixed Length Files** form is designed to load the results of various test files for the current year and previous years into **Aeries™**. This form can be used by the District or School. The form may vary slightly but the procedures are the same. This form contains various record layouts available for importing data, for example:

- ACE
- ACT
- Aprenda 3
- CAPA
- CELDT
- GOV Program
- GSE
- PSAT
- SABE
- SAT
- Terra Nova

The School or District can select which record layout to use when loading their test scores. After the test scores are loaded they will be stored in a local table. **Remember that when you are using a local table it is not accessible from another machine.** If a new Aeries Version has been Updated the data in the local table will need to be re-loaded.

Once the data is loaded it will be compared to the **STU** table to find student matches. When a match is performed, the school number, student number and permanent ID number from the **STU** table is added to the local table.

After the match a report can be generated to list all unmatched students. The permanent ID, school number and student number can then be located for unmatched students and can be manually updated.

When the matches between the two tables are as complete as possible the local test table can then update the **Testing** tables with the student's scores using the **Update** button.

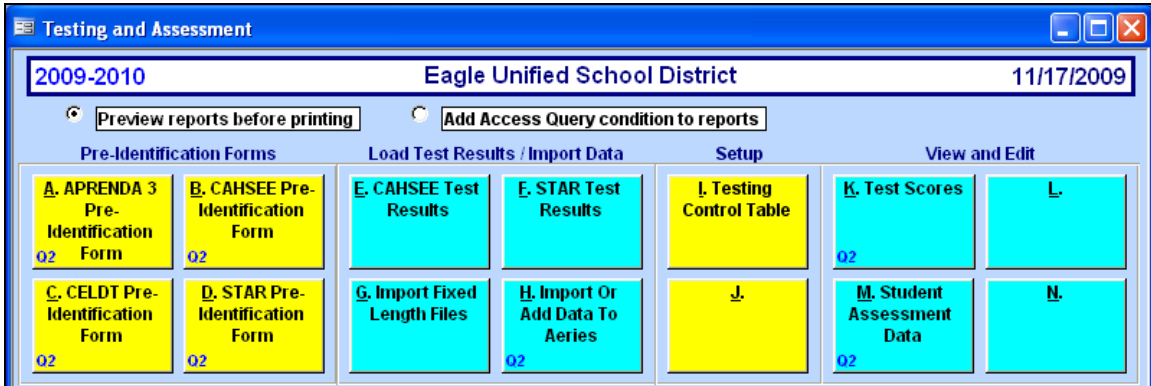

NOTE: Please take note that the macro Load SAT Data is no longer available for importing SAT Data.

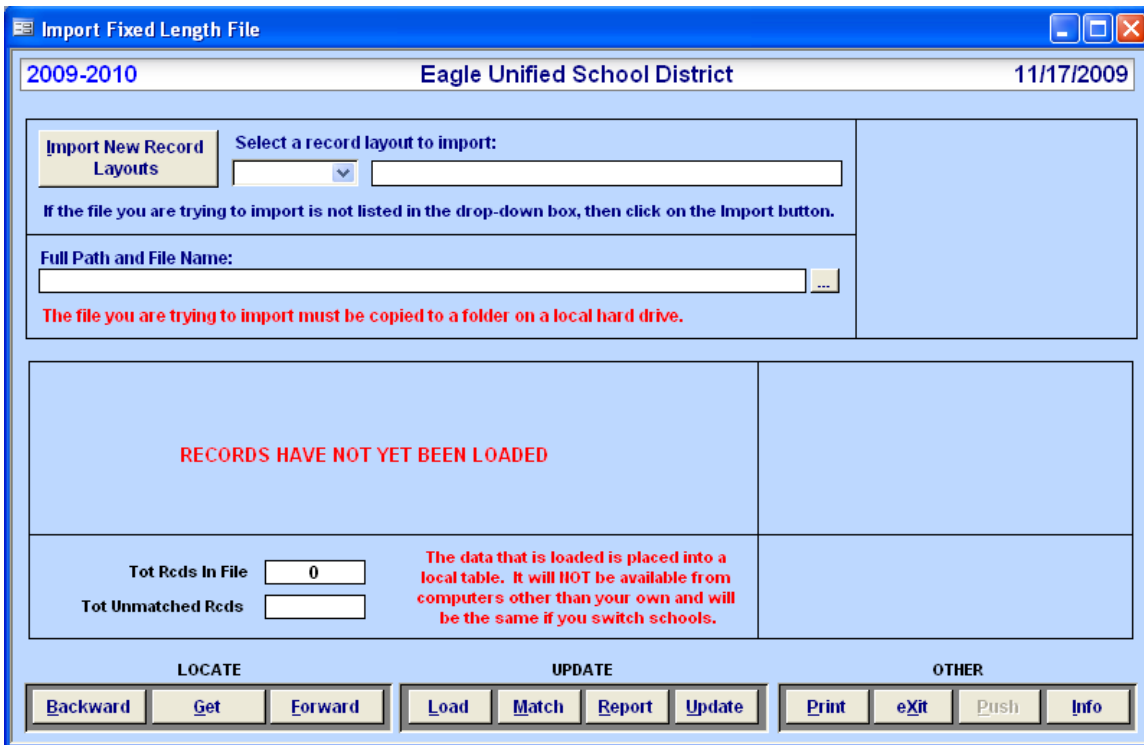

Please be aware that Eagle Software's objective is to provide their users with documented procedures, such as those that follow, in an attempt to expedite the steps necessary to accomplish certain tasks within **Aeries™**. However, Eagle Software recognizes that each school and district using **Aeries™** has established their own unique guidelines and policies.

By using these procedures you assume full responsibility for the appropriate application, the results of their use, any impact upon your database and conforming to all guidelines and policies that have been established by your school or district.

IMPORT FIXED LENGTH FILES To access the **Import Fixed Length Files** form, click the mouse on **Testing and Assessment**. Click the mouse on the **Import Fixed Length Files** button.

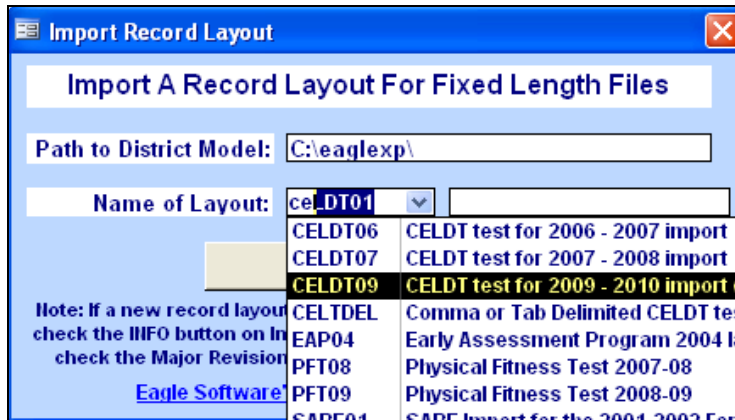

The **Import Fixed Length Files** form will display. The **Import New Record Layouts** button will access all record layouts available for various tests. If the record layout is not listed it is not available as of yet.

To import a record layout click the mouse on the **Import New Record Layouts** button.

Click the mouse on the **Name of Layout** drop down and a list will display of record layouts available for importing. Select the record layout to be imported.

Click the mouse on the **Import** button. A message will display indicating that the record layout has been added. Click the mouse on the **Exit** button.

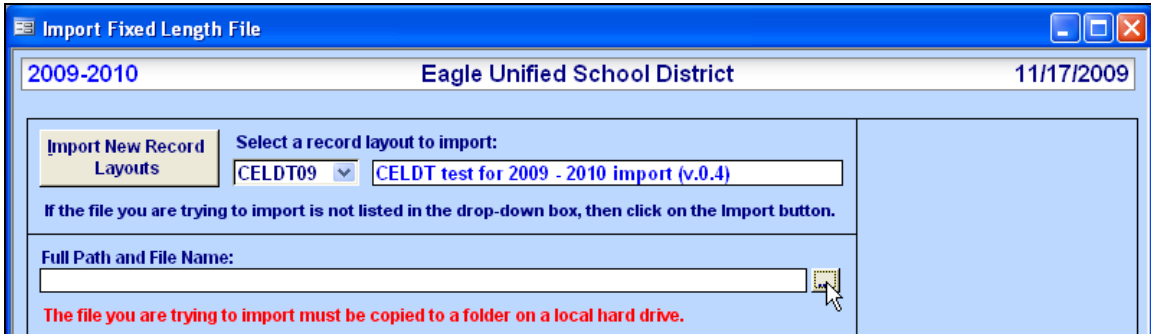

Once the record layout has been imported it can be selected from the **Select a Record Layout to Import** drop down list.

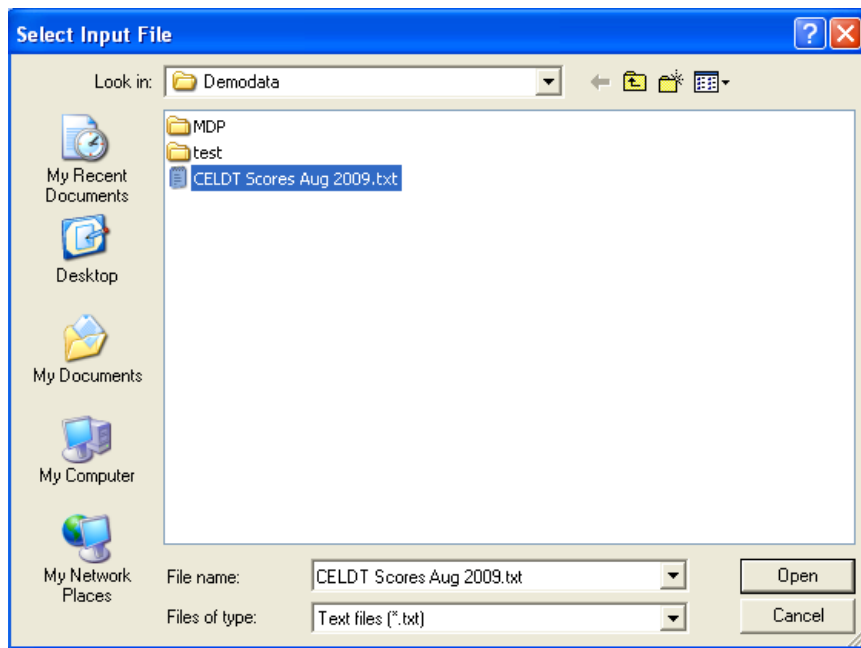

NOTE:

If the record layout is not listed it has not been imported.

The location of the file to be imported must now be entered in the **Full Path and File Name** field. To locate the file click the mouse on the **File Selection** box to the right of the field.

The following file selection box will display. Click the mouse on the file selected and the file name will automatically display in the **File Name** field. Click the mouse on the **Open** button.

NOTE:

Please note that if the file extension is **.SCR**, for example **SAT.SCR**, you **MUST** rename the file extension to **.TXT**, for example **SAT.TXT**.

The path and file selected will display. Click the mouse on the **Load** button. The form will display the information for the first student located in the local table.

Some test files do not contain a test date for any of the records loaded and will be assigned a default test date for each record when the **Update** process is done.

DEFAULT TEST DATE

Starting in the 2009 school year the first time CELDT is imported the oldest test date located in the file will display in **Default Test Date**. This date will only be used as the test date for students in the file that do not have a testing date. All other students with a test date in the test record will have their exact test date loaded.

A **Test Admin** will also be assigned to this test load. The Test Admin will contain four digits with the first month of the default test date and the last two digits of the year.

Import Fixed Length File

2009-2010 Eagle Unified School District 11/18/2009

Import New Record Layouts Select a record layout to import: CELDT09 CELDT test for 2009 - 2010 import (v.0.4)

If the file you are trying to import is not listed in the drop-down box, then click on the Import button.

Full Path and File Name: C:\eagle\Demodata\CELD T Scores Aug 2009.txt

The file you are trying to import must be copied to a folder on a local hard drive.

Default Test Date 06/21/2009 Test Admin 0609

The Default Date is either the oldest test date found in the file. This date will be loaded for all students without a test date in the file. Also, it will be used to create the Test Admin.

ID Number 0099000132 Student No [] Last Name ABBOTT First Name LAURA

State ID 999999999 Grade 00 Birthdate 12/21/2003 Gender [] County/District [] SchlCode 9999999

Matched to... Perm ID# 0 Student Lookup

Sch Code 000 Edit Sch Code

Tot Rcds In File 942 Tot Unmatched Rcds 942

The data that is loaded is placed into a local table. It will NOT be available from computers other than your own and will be the same if you switch schools.

Sort by name only

LOCATE UPDATE OTHER

Backward Get Forward Load Match Report Update Print eXit Push Info

The **Matched To** information will display zeros in the **Student#** or **Perm ID** field for all students. The **Tot Rcds in File** and **Tot Unmatched Rcds** at the bottom of the form will display the number of records loaded into the local table.

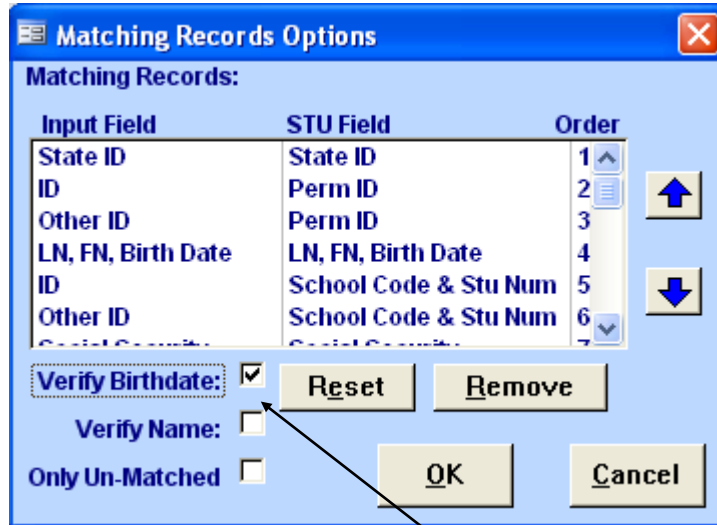

MATCH TEST DATA

After the test table is loaded the **Match** can be performed. This option will compare the local test table to the school database.

It will use various comparisons to locate the student in the **STU** table. If the student is located the student's permanent ID number, school number and student number will be copied into the local test table.

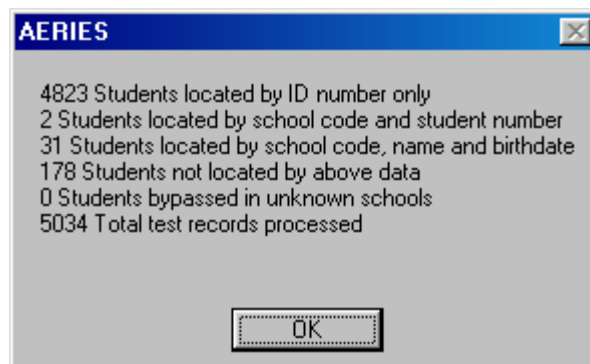

Click the mouse on the **Match** button and the following message will display. Click the mouse on the **Yes** button.

The following options will display in the order that the records will be matched. The order can be changed by hi-liting the input field and using the up or down **arrow keys** on the right.

It is suggested that the records **verified** by selecting the birthdate and/or name. This process can also be run for **Only Un-matched** records. After all selections are made click the mouse on the **OK** button.

When the data match has completed a message will display. This message includes the number of students that were matched and the number of students that could not be located. The total number of test records processed will also display. Click the mouse on the **OK** button.

The **Import Fixed Length File** form will now display a **Student #** or **Perm ID #** for students located in the **STU** table. Unmatched students will display zeroes in the **Student#** or **PermID** field.

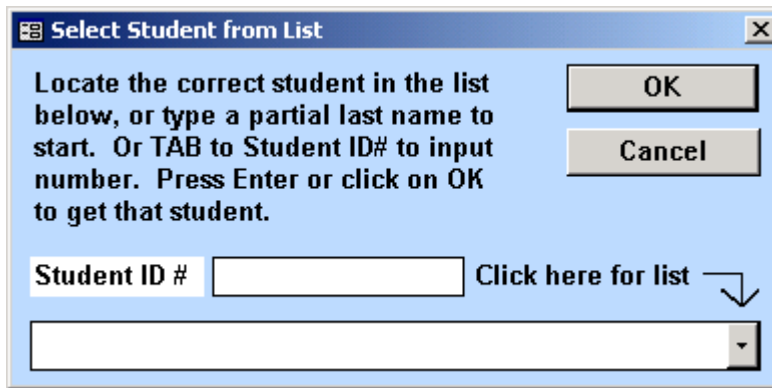

To display only unmatched students click the mouse on the **Show Unmatched Test Records Only** box. The only students displayed will be students containing zeroes in the **Student#** or **PermID** field.

To sort students by name click the mouse on the **Sort by Name Only** box. The data will now display in student name order. If the school version contains all schools an option is available to only display this school's students. Click the mouse on the **Show Only this School** box and only the students for this school will display.

To locate a student in the **STU** table to be matched to the student displayed click the mouse on the **Stu Lookup** button.

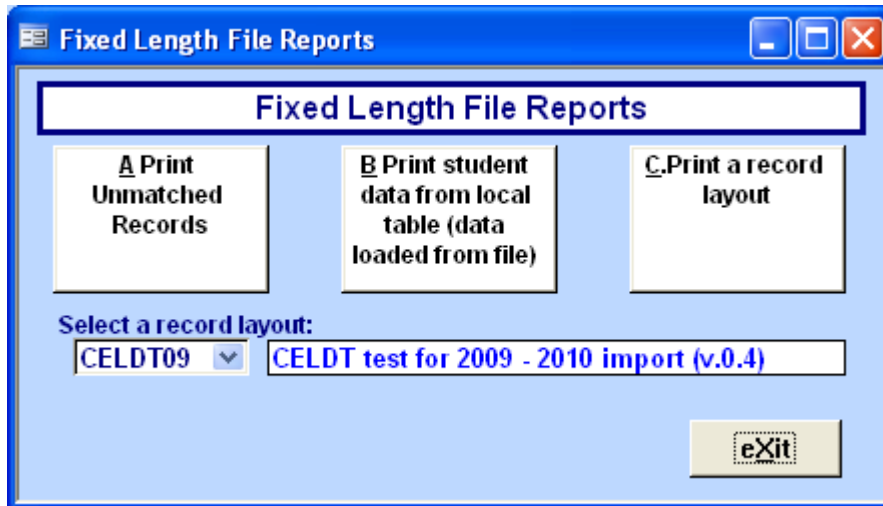

The following selection box will display. Enter part of the student name in the text field. Click the mouse on the **drop down** arrow. A list of students will display.

If the student is located click the mouse on the student's name and click the mouse on the **OK** button. The **Student#** or **Perm ID** number will be loaded.

FIXED LENGTH FILE REPORTS

Due to possible data errors or students no longer enrolled in the District some students may not match. Prior to running the **Update** function it is suggested that as many students as possible be matched. Reports are available to provide lists for research. Click the mouse on the **Reports** button. The following form will display with the current **Record Layout** being utilized at the bottom.

The **Print Unmatched Records** report can be utilized to try and locate students in the **STU** table for manual entry. If a student is located the student number can be logged onto the report. The correct **School** and **Student#** fields can then be manually entered on the **Import Fixed Length File** form.

To print a listing of unmatched records click the mouse on the **Print Unmatched Records** button. A report will be generated with the students imported into the local table that currently do not have the **Student#** in the table.

UPDATE TEST TABLES

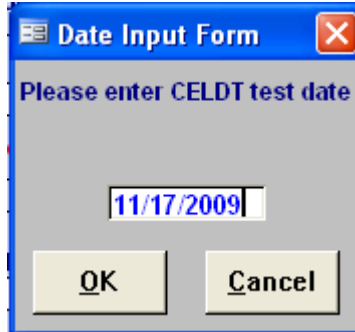

After the **local** table is matched and students have been manually updated, the data can then be loaded into the Aeries **Testing** tables. Click the mouse on the **Update** button and the following message will display. To update the scores into the **Testing** tables click the mouse on the **Yes** button.

REMEMBER:

Prior to updating the test scores it is the School or Districts responsibility to verify and match the student's correctly to ensure the scores get loaded into the correct student record.

Some test loads do not have test dates in the test records. If there is **NO** test date located in any of the test records the following **Date Input** box will display with today's date as the default date.

A screenshot of a Windows-style dialog box titled "Date Input Form". The dialog has a blue title bar with a close button (X) on the right. The main area is light gray and contains the text "Please enter CELDT test date" in blue. Below this text is a text input field containing the date "11/17/2009". At the bottom of the dialog are two buttons: "OK" and "Cancel".

Verify the default **Test Date** to be loaded for each test record and enter the date. Click the mouse on the **OK** button and the update process will begin.

After the update is complete a message will display with total records processed, total records deleted that were previously added and total new records added. Click the mouse on the **OK** button.

DISTRICT - PUSH TEST RESULTS

If the **Import Fixed Length File** process has been generated at the District the test scores and additional test data **MUST** be pushed back to the School databases.

PLEASE NOTE - If a default **Test Admin** has been generated and displays on the **Import Fixed Length File** form you **MUST** know the name of the **Testing Admin** before pushing the test records out to the school databases.

After the Test tables have been updated the results can be “pushed out” to the school sites by clicking the mouse on the **Push** button.

The screenshot shows the 'Push Testing Data' application window for Eagle Unified School District. The window title is 'Push Testing Data' and it shows the date '11/17/2009'. The main area is divided into two panes. The left pane, titled 'TST Tests', lists various tests with checkboxes: SAT-9T, CCS - CA Content Standards, CPS - CA Performance Standards, CST - CA Standards Test, CAT-6 - CAT/6 Survey, CAPA - CA Alt Perf Assessment, CAHSEE, CELDT (checked), STS - Standards-based Tests in Spanish, EAP - Early Assessment Program, APRN3 - APRENDA, and CMA - California Modified Assessment. There are 'All' and 'None' buttons for this list. Below the list are radio buttons for 'Use Test Date' and 'Use Test Admin' (selected), and checkboxes for 'Include TEX' (checked) and 'Include AUT'. A 'Testing Admin:' dropdown menu and a 'Push TST records' button are also present. The right pane, titled 'Push to which schools?', has 'All' and 'None' buttons and a list of schools with radio buttons: Golden Eagle Elementary School, Tawny Eagle YR Elementary School, Hawk Elementary for ATT, Bald Eagle Intermediate School, Screaming Eagle High School, and Aeries Continuation School. An 'eXit' button is at the bottom left.

For more information on performing this procedure please see the document **Push Test Results District DB**.

CLIENT SERVER TEST DATA

The Client Server does not utilize the **Push Testing Data** form and the **Push** button is grayed out. All Test data is automatically updated to the SQL Server when the **Update** button is utilized.
