# Aeries SIS

Aeries AIR

Aeries Automated Internet Registration (AIR) complements Aeries, allowing parents to quickly start the process of registering a new student for school via a simple wizard based web site. Information about the student such as emergency contact, medical and language information will be collected. Upon completion, the student's information is electronically downloaded by the school in Aeries.

System Highlights
- Complements existing Aeries system
- Easy implementation
- Secure
- Highly dynamic configuration for registration questions
- Full integration with AeriesCS
- Electronic download of completed registrations to Aeries
- Save clerk data entry time and errors
- Final confirmation page to review information before final submission

System Features
- Implement with ease, selectively "enable" schools to use AIR
- Street table integration for auto school assignment
- Register a student using an existing registration
- Resume unfinished registrations
- Google maps integration
- Customizable many pages and questions with HTML formatted text
- Wizard interface steps users through questions

A Dynamic Solution for Every District

Aeries Automated Internet Registration provides a dynamic solution for every district to capture new student registration data. A multitude of options are available to enable/disable questions and customize pages with HTML text. Gone are the days where schools need to collect and manually enter data into Aeries. With this web based solution, parents enter all necessary data in a wizard style interface that steps them through each set of questions. Throughout the system, validation checks are made to ensure all text fields, dates and options are made before continuing on to the next step. Customizable supplemental multiple choice questions and authorizations allow districts to collect data they need. Once complete, a final confirmation page summarizes all data collected.

Simple and Secure Transfer of Registration Data

Registration data is kept secure in a separate SQL database from your live Aeries data. Within AeriesCS, new registrations can be easily downloaded with a few clicks. Schools can also access the summary page for any parent to aid in any troubleshooting of printing, or hard copy signatures that may be required. Once a registration is downloaded to Aeries, changes or corrections to any data can be made.
